

REMARKS

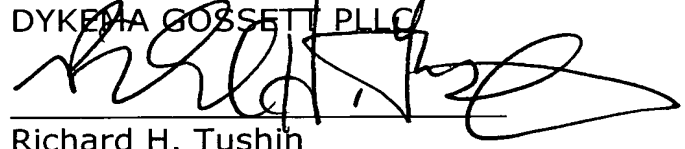

By this Amendment the specification has been amended on page 3 to correct the reference numeral listing of black and grey leads, and to clarify the relationship of the leads as noted on page 2, lines 12-14. The relationship as described is clear from the presented figure. Also, the specification at page 3, lines 16-17, states that the vias 3a, 3e, 3d and 3b form the corners of a square.

Nothing in Hwang would suggest the layered structure as now claimed.

Respectfully submitted,

DYKEMA GOSSETT PLLC
